

BT Radianz Connect Ethernet.

BT Radianz Connect Ethernet is a high quality, cost-effective global platform that provides resilient and reliable managed connectivity to facilitate electronic trading between the world's key market centres. If you're hosted in one centre, you can connect to other clients and other data centre locations with an optimised, secure Radianz connection.

The financial markets industry is highly demanding. Financial services organisations need to trade quickly, compliantly and securely across the globe from wherever they are located. Radianz Connect Ethernet can help make that happen by delivering low-cost, managed data centre connectivity between customer and trading partner locations whether they be local, regional or global.

This highly scalable service delivers a real alternative where customers require direct point-to-point managed Ethernet connectivity to access marketing participants and liquidity venues. Offering global reach, Radianz Connect Ethernet enhances the BT Radianz Cloud and strengthens a portfolio that includes global low latency managed connectivity and a suite of compute capabilities.

Solution.

Execution of fast trading requires reliable, secure access to the markets and data you need from wherever your traders are located in the world. In a global marketplace traders have to be able to trade in venues around the world which are driven by their business opportunities. Radianz Connect Ethernet offers:

- Dedicated ethernet point-to-point connectivity.
- Low-cost access from customer locations to global markets located in data centres.
- A real alternative to using the internet, with secure and reliable access to multiple cloud providers.
- Simple, fast, highly scalable, resilient global connectivity with access up to 10G.
- Full and comprehensive reporting, service assurance and SLA commitment.

Our solution enables you to operate in a virtual global marketplace without the need to be physically present in all locations, so driving down cost and significantly reducing TCO. Connection to trading partners and venues through a single interface simplifies connectivity and reduces complexity.

BT Radianz Connect Ethernet data centres.

Providing access to the world's key financial markets

From pre-trade to post-trade, execution and settlement, BT Radianz delivers the availability you need. Our network extends to all the key global locations for trading and data hosting, using our own facilities and those of third parties to ensure the broadest range of options available to you. BT Radianz Connect Ethernet provides the fully managed point-to-point solution needed to ensure that all your data requirements are met.

To maintain the high standard of service we deliver, our engineering and support teams monitor Radianz Connect Ethernet components 24x7 and provide comprehensive assurance of the network fabric and each connection. You can view each service through the MyBT portal to validate, verify and visualise your BT Radianz connectivity, so you can be confident that optimal end-to-end performance and reliability is being delivered and maintained.
